

# A SISTER'S HOPE

August 4, 2015

Go to 40K NL and start today with training and fund raising!

## Only one non-profit in The Netherlands focuses on funding breast cancer research

A Sister's Hope is the only non-profit organization in The Netherlands with one focus: funding breast cancer research aimed at saving lives.

Other services and projects are extremely important to the breast cancer community, and there are other organizations that work to meet those needs. So A Sister's Hope keeps one thing as the target: supporting research projects that are seeking the secrets to saving the lives of those we love who are facing breast cancer.

Simple, right? With so many events and organizations claiming to fundraise for cancer research, it can be confusing, frustrating and time-consuming to identify where to apply your money and efforts.

Be assured that A Sister's Hope is quite likely one of the leanest and most efficient non-profit organizations in the world working to raise significant dollars for breast cancer research.

Money raised by A Sister's Hope is placed quickly into the hands of researchers so they can do their vital work as soon as possible. The lengthy proposal review processes used by other non-profits is outdated and needs immediate review and to be changed. Maybe the life of someone YOU love is depending on it.

As more events promote themselves as cancer research fundraisers, coupled with the economic crisis in the European Union, your participation in this

year's events is critical. The minimum donation requirement for the new 40K two-day walk is just 750 euro, a challenge each of you can easily meet between now and October 3.

Register today, before one more life is unnecessarily claimed by this disease!

**Register now for the Oct. 3-4, 2015 40K**
